Practical-11

Student Management CRUD with Search and Filter

Theory

1. Are SELECT, INSERT, UPDATE, and DELETE operations working?

Answer: Yes, SELECT, INSERT, UPDATE, and DELETE operations are working to retrieve, add, modify, and remove student records from the database

2. Is search by name/email/course implemented?

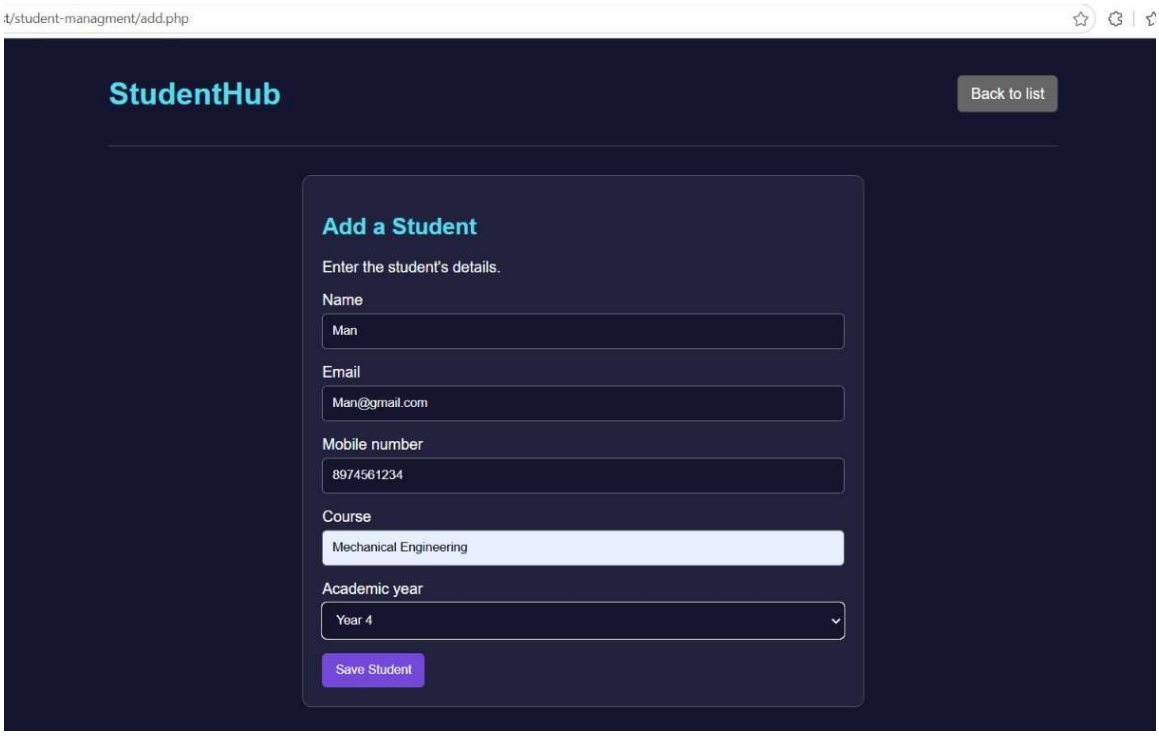

Answer: Yes, search functionality is implemented to find student records by name, email, or course.

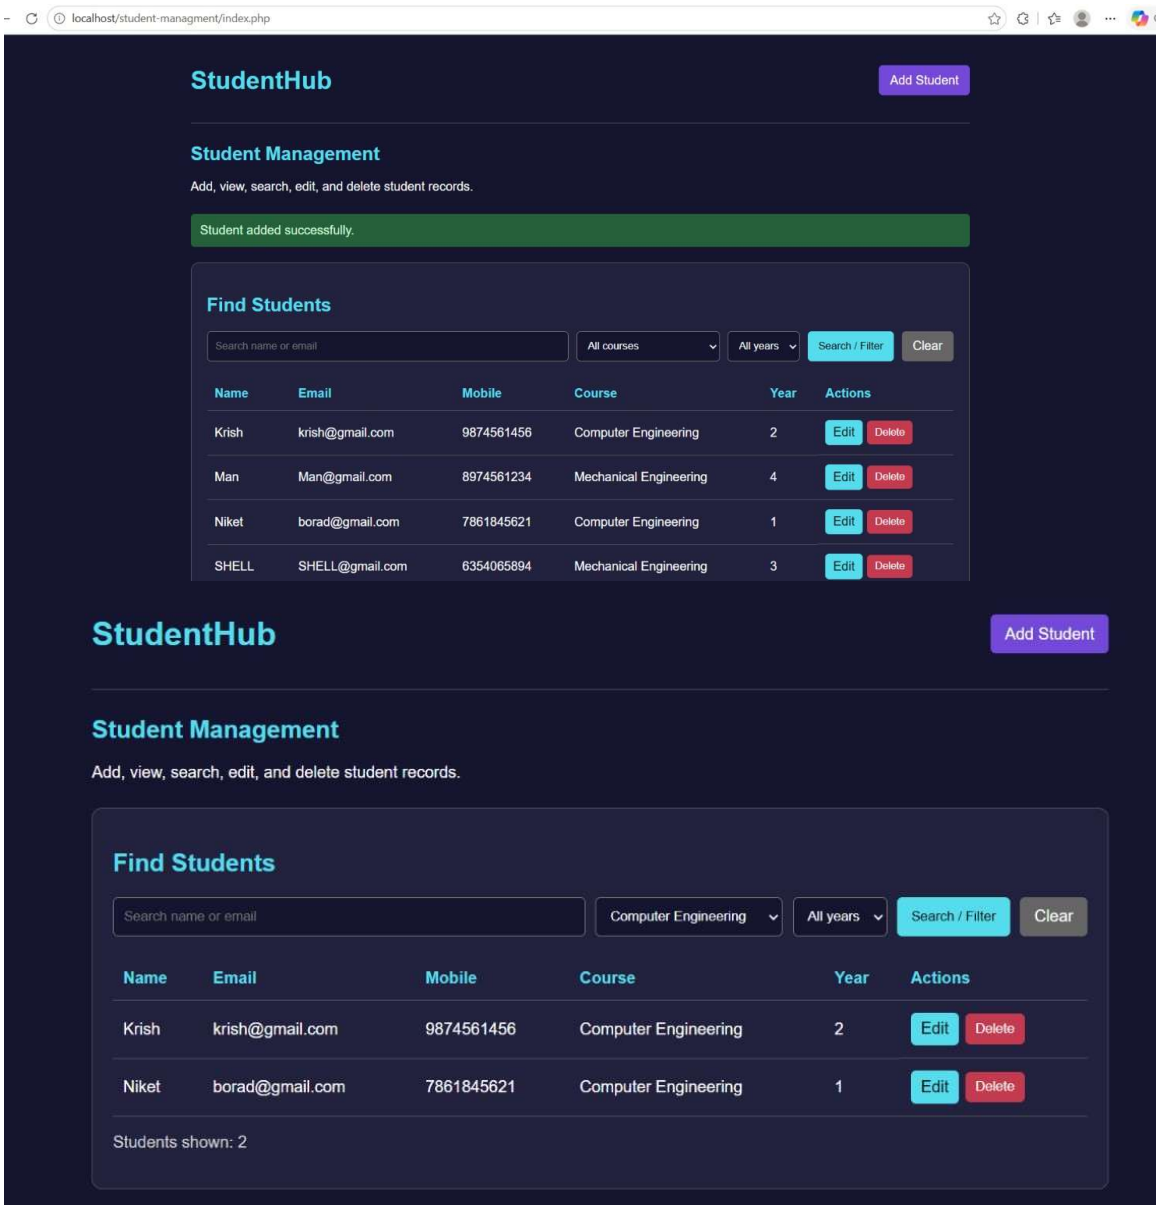

3. Are delete operations confirmed before execution?

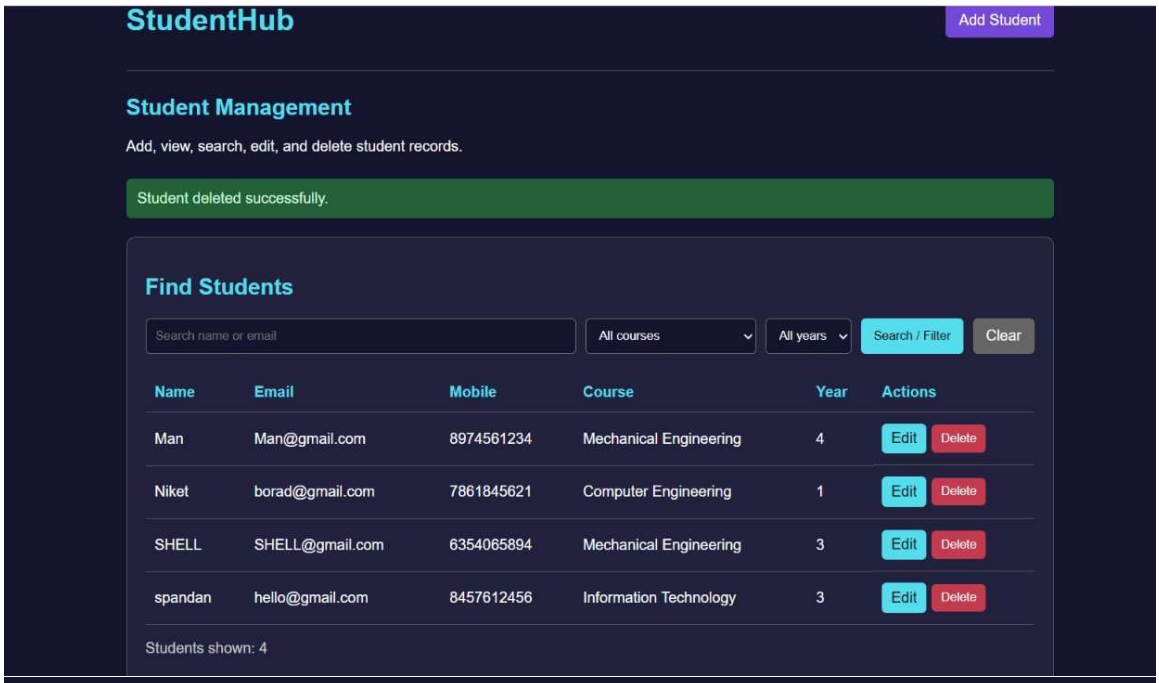

Answer: Yes, a confirmation message is displayed before deleting a record to prevent accidental deletion.

XAMMP SEVER ;-

https://localhost/student-managment/index.php

B. Challenges Faced:

I faced some difficulties in connecting PHP with the MySQL database.

I had to fix errors while adding, updating, and deleting student records.

I faced challenges in implementing search and filter functionality.

I learned to use prepared statements to make database queries safer.

I had to display proper success and error messages for different operations.

C.Learning Outcome:-

I learned to perform CRUD operations, search and filter student records, and use PHP with MySQL to manage data securely.
